

JOIN OUR TEAM

CONTROLS ENGINEER / TECHNICIAN

Pushing the limits of technology has made USNR the premier global producer of wood processing equipment. Ongoing employee training and technological upgrades ensure USNR is at the forefront of the industry. We actively seek talented individuals to help continue our tradition of innovation and market leadership.

USNR is looking for talented, self-motivated individuals to join our Programmable Logic Control team at our Salmon Arm, BC location.

RESPONSIBILITIES

The controls team at USNR develops a wide range of machine control applications from material handling to complex motion control. Our controls platforms include ControlLogix, Delta RMC and FactoryTalk View/WonderWare HMI.

- ▶ Gathers development specifications to ensure that the full range of responsibilities and project requirements are understood prior to beginning a task.
- ▶ Develops features from design through to completion.
- ▶ Manages their own personal schedule including accurately estimating how long work will take to complete and prioritizing their workload.
- ▶ Provides support for legacy systems including troubleshooting and resolving issues.
- ▶ Follows prescribed coding standards and methodologies.
- ▶ Travels to customers' sites for final installation and commissioning.

REQUIREMENTS

- ▶ Experience with programming Rockwell Software ControlLogix, RSLogix PLC products
- ▶ Sawmill industry experience is a definite asset
- ▶ Diploma, degree or equivalent work experience in one of the following areas: technology, control system design or engineering

USNR offers an excellent team-oriented working environment with comprehensive benefit programs. Please submit resume in confidence to:
